SUBJECT INDEX

- acetic acid bacteria, flagellation of, 442
adenovirus infection of infants and children, 487
adenoviruses, 1
aerocins, 24
Aeromonas, flagellation of, 442
age, effect on susceptibility to infectious diseases, 102
Allescheria, nutrition of, 406
alveicins, 24
amino acid requirements of fungi, 406
amino acids of mycoplasmas, 185
animal health, effect of microorganisms on, 251
antibiotic sensitivity of mycoplasmas, 185
antibody of *Treponema pallidum*, 222
arboviruses, 1
arizonacins, 24
arthritis, mycoplasmas in, 185
Azotobacter, flagellation of, 442
- bacilli, tuberculosis caused by, 466
Bacillus, use as microbial insecticide, 364
Bacillus anthracis, detection of, 222
Bacillus lentimorbus, in milky disease of Japanese beetle, 373
Bacillus popilliae, in milky disease of Japanese beetle, 373
Bacillus subtilis, fine structure of, 277, 299
bacteriocins, 24
birth-death model in experimental microbiology, 102
Blastomyces, nutrition of, 406
Bordetella pertussis, identification of, 222
borreliae, 46
bovine-type bacilli, tuberculosis caused by, 466
Brucella, detection of, 222
- calves, neonatal disease of, 75
Candida, nutrition of, 406
caratovoricens, 24
carbon metabolism of sulfate-reducing bacteria, 425
cell-wall replication, 326, 345
cell-wall synthesis, 345
cericins, 24
children, adenovirus infection of, 487
chondrioids of *Bacillus subtilis*, 299
chromosome transfer in bacterial conjugation, 161
classification of bacteria, flagellation in, 442
clinical laboratory data, electronic handling of, 554
cloacins, 24
Clostridium, use as microbial insecticide, 364
Coccidioides, nutrition of, 406
Coleman's organism, nomenclature of, 359
colibacillosis, *Escherichia coli* isolated from, 75
colicins, classification of, 24
computer search routines, 554
conjugation, chromosome transfer in, 161
Cordyceps, infection of insects by, 382
corrosion, bacterial, 425
coxsackieviruses, classification of, 173
Cryptococcus, nutrition of, 406
cytoplasmic structure of cells, 299
- data-processing applications, 560
deoxyribonucleic acid, molecular state of, 277
deoxyribonucleic acid viruses, 1
Desulfotomaculum, description of genus, 359
Desulfovibrio orientis, nomenclature of, 359
document collection, bacteriological information in, 546
- echoviruses, classification of, 173
electron microscopy of viruses, 477
electronic handling of clinical laboratory data, 554
enterococci, 24
enteroviruses, classification of, 173
Entomophthora, infection of insects by, 382
enzyme activity, relationship to viruses, 143
erythrocyte hemagglutination for typing adenoviruses, 487
Escherichia coli, enteropathogenic, 222
Escherichia coli, mating types in, 161
Escherichia coli, relation to neonatal disease of calves, 75
- F' strains, chromosome transfer by, 161
fertilizers, bacterial, 251
filtration of viruses, 477
fine structure of bacteria, 277, 299, 326, 345
fixation of cells, 277
flagella, bacterial, 442
fluocins, 24
fluorescent-antibody techniques in diagnostic bacteriology, 222
food, antibacterial substances in, 397
food production, increasing through microbiology, 251
Francisella, detection of, 222
fungal parasites, 382
fungi, in insects, 397
fungi, nematode-trapping, 382
fungi, pathogenic, nutrition of, 406
- genetic studies of inbred rabbits, 466
genetics of *Escherichia coli* K-12, 161
genitourinary tract disease, mycoplasmas in, 185
- Harposporium*, infection of nematodes by, 382
hemagglutination-inhibition test for typing adenoviruses, 487
herpesviruses, 1
Hfr strains, chromosome transfer by, 161
Histoplasma, nutrition of, 406
host heterogeneity, effect on response-probability curves, 102
host susceptibility, variations in, 102
human-type bacilli, tuberculosis caused by, 466
hydrogen metabolism of sulfate-reducing bacteria, 425

- immunity in insects, 397
immunofluorescence, diagnostic applications of, 222
immunofluorescence for observation of cell-wall replication, 326
independent-action model in experimental microbiology, 102
infants, adenovirus infection of, 487
infectiousness of microorganisms, 102
influenza viruses, identification of, 496
information science, symposium on, 505, 506, 516, 523, 534, 544, 546, 560, 577
information systems engineering, 546
insect vectors of borreliae, 46
insecticides, microbial, 364, 373, 382, 388, 397
insects, antibacterial substances in, 397
insects, fungal parasites of, 382
insects, microbiological control of, 251
invertebrates, diseases of, 388
- Japanese beetle, milky disease of, 373
journals, growth in numbers of, 523
- keyword indexed reference pool, 577
- L forms, relationship to mycoplasmas, 185
lactic dehydrogenase virus, 143
Leptospira, detection of, 222
lipid requirements of mycoplasmas, 185
Listeria monocytogenes, detection of, 222
- macrophage inhibition of bacillus growth, 466
marcescins, 24
marine bacteria, specificity of, 9
megacins, 24
meningitis, bacterial, 222
microbial insecticides, 364, 373, 382, 388, 397
microbiological dissonance, 269
microbiology, international aspects of information in, 506
microorganisms, effect on food supply, 251
milky disease of Japanese beetle, 373
mineral formation by bacterial fermentation, 425
monocins, 24
Mycoplasma species of man, 185
myxoviruses, 1
myxoviruses, identification of, 496
- National Referral Center for Science and Technology, 544
Neisseria gonorrhoeae, identification of, 222
nematodes, fungal parasites of, 382
neonatal disease of calves, *Escherichia coli* in, 75
nitrogen fixation, nonsymbiotic, 251
nitrogen metabolism of sulfate-reducing bacteria, 425
nucleic acid from lactic dehydrogenase virus, 143
nucleic acid types of viruses, 477
nucleic acids of mycoplasmas, 185
nucleoids, fine structure of, 277
nutrition of sulfate-reducing bacteria, 425
- oil wells, sulfate-reducing bacteria in, 425
- papovaviruses, 1
parainfluenza virus type 4, identification of, 496
parainfluenza virus type 5, isolation from man, 477
Pasteurella pestis, detection of, 222
periodical publications, patterns of, 523
pesticides, 24
pharmacological data, retrieval of, 560
phytovirology, international information center in, 516
picornaviruses, 1
picornaviruses, subclassification of, 173
plant losses caused by microorganisms, 251
plasmalemmosomes, 277
pleuropneumonia-like organisms, 185
pneumocins, 24
pneumonia, mycoplasmas in, 185
polioviruses, classification of, 173
poxviruses, 1
protein requirements of mycoplasmas, 185
proteins, effect of legume inoculation on, 251
protozoa, in insects, 397
Pseudomonas, flagellation of, 442
Pseudomonas aeruginosa, as insect pathogen, 364
publication trends in microbiology, 534
pyocins, 24
- rabbits, tuberculosis in, 466
relapsing fever, borreliae in, 46
reoviruses, 1
replication of bacteria, 277, 299, 326, 345
respiratory disease caused by *Mycoplasma pneumoniae*, 185
respiratory syncytial virus, identification of, 496
respiratory viruses, 173
retrieval from keyword indexed reference pool, 577
retrieval of clinical laboratory data, 554
retrieval of pharmacological data, 560
rhinoviruses, definition of, 173
Rhizobium, flagellation of, 442
ribonucleic acid viruses, 1
- Salmonella typhosa*, identification of, 222
salt tolerance of marine bacteria, 9
salt tolerance of sulfate-reducing bacteria, 425
seawater, survival of organisms in, 9
sectioning of cells, 277
Septobasidium, infection of insects by, 382
Serratia marcescens, as insect pathogen, 364
sewage sludge, sulfate-reducing fermentation of, 425
sex factors, replication of, 161
Shigella, grouping of, 222
simian viruses, filtration of, 477
soil management by legume inoculation, 251
soils, sulfate-reducing bacteria in, 425
sporeforming bacterial pathogens, 364
sporeforming sulfate-reducing bacteria, 359
Sporotrichum, nutrition of, 406
staining of bacterial flagella, 442
staphylococci, 24
statistical analysis of laboratory data, 554
streptococci, group A, identification of, 222
sulfate-reducing bacteria, 359, 425

- sulfate-reducing bacteria, flagellation of, 442
sulfur metabolism of sulfate-reducing bacteria, 425
taxonomy, use of flagellation in, 442
tick-borne relapsing fever, 46
tissue cultures, mycoplasma contamination of, 185
Treponema pallidum, detection of, 222
tuberculosis, resistance to, 466
tumors, relationship to viruses, 143
ultrafiltration, use for grouping viruses, 477
vibriolike organisms, flagellation of, 442
virus, lactic dehydrogenase, 143
viruses, animal, grouping of, 477
viruses, in insects, 397
viruses, index of, 516
viruses, origin of, 1
viruses, picornaviruses, subclassification of, 173
vitamin requirements of fungi, 406
vitamin requirements of mycoplasmas, 185
water, sulfate-reducing bacteria in, 425
yeasts, pathogenic, nutrition of, 406

No. 1, MARCH

Viruses and Noah's Ark. C. H. ANDREWES.....	1
The Question of the Existence of Specific Marine Bacteria. ROBERT A. MACLEOD...	9
The Bacteriocins. PETER REEVES.....	25
Borreliae, Human Relapsing Fever, and Parasite-Vector-Host Relationships. OSCAR FELSENFELD.....	46
<i>Escherichia coli</i> and Neonatal Disease of Calves. CLIVE C. GAY.....	75
Independent-Action and Birth-Death Models in Experimental Microbiology. GEORGE SHORTLEY AND JUDD R. WILKINS.....	102

No. 2, JUNE

Lactic Dehydrogenase Virus. ABNER L. NOTKINS.....	143
Chromosome Transfer in Bacterial Conjugation. EDWARD A. ADELBURG AND JAMES PITTARD.....	161
Subclassification of Picornaviruses. LEON ROSEN.....	173
<i>Mycoplasma</i> Species of Man. LEONARD HAYPLICK AND ROBERT M. CHANOCK.....	185
Fluorescent-Antibody Techniques in Diagnostic Bacteriology. W. B. CHERRY AND M. D. MOODY.....	222
Potential for Increasing Food Production Through Microbiology. ROY C. DAWSON...	251

No. 3, SEPTEMBER

Microbiological Dissonance. ORVILLE WYSS.....	269
Symposium on the Fine Structure and Replication of Bacteria and Their Parts:	
I. Fine Structure and Replication of Bacterial Nucleoids. G. WOLFGANG FUHS...	277
Discussion. PHILIP C. FITZ-JAMES.....	293
II. Bacterial Cytoplasm. WOUTER VAN ITERSOM.....	299
III. Bacterial Cell-Wall Replication Followed by Immunofluorescence. ROGER M. COLE.....	326
IV. Unbalanced Cell-Wall Synthesis: Autolysis and Cell-Wall Thickening. GERALD D. SHOCKMAN.....	345
Classification of the Spore-Forming Sulfate-Reducing Bacteria. L. LEON CAMPBELL AND JOHN R. POSTGATE.....	359
Symposium on Microbial Insecticides:	
I. Bacterial Pathogens as Microbial Insecticides. T. A. ANGUS.....	364
II. Milky Disease of the Japanese Beetle. R. A. RHODES.....	373
III. Fungal Parasites of Insects and Nematodes. DAVID PRAMER.....	382
IV. Diseases of Invertebrates Other Than Insects. EDWARD A. STEINHAUS.....	388
V. Immunity in Insects. A. M. HEIMPEL AND JOHN C. HARSHBARGER.....	397
Nutrition of Systemic and Subcutaneous Pathogenic Fungi. GERALD L. GILARDI.....	406

No. 4, DECEMBER

Recent Advances in the Study of the Sulfate-Reducing Bacteria. JOHN R. POSTGATE..	425
Flagellation as a Criterion for the Classification of Bacteria. MURIEL E. RHODES....	442
Macrophage Function in Infectious Disease with Inbred Rabbits. MAX B. LURIE AND ARTHUR M. DANNENBERG, JR.....	466
Use of Ultrafiltration for Animal Virus Grouping. G. D. HSIUNG.....	477
Recovery and Identification of Adenovirus in Infections of Infants and Children. A. J. VARGOSKO, H. W. KIM, R. H. PARROTT, B. C. JEFFRIES, D. WONG, AND R. M. CHANOCK.....	487
Recovery and Identification of Human Myxoviruses. J. G. CANCHOLA, R. M. CHANOCK, B. C. JEFFRIES, E. E. CHRISTMAS, H. W. KIM, A. J. VARGOSKO, AND R. H. PARROTT.....	496
Symposium on Information Science	
Dedication.....	505
I. International Aspects of Information in Microbiology. P. R. BRYGOO.....	506

II. Progress in the Organization of an International Information Center in Phyto-virology. H. H. THORNBERRY.....	516
III. Changing Patterns of Scientific Periodical Publication. G. MILES CONRAD...	523
IV. Publication Trends in Microbiology. FREDERICK C. KULL.....	534
V. The Microbiologist and the National Referral Center. MARY B. O'HARA...	544
VI. Form and Utilization of Bacteriological Information in a Select Document Collection. WALTER M. BEJUKI.....	546
VII. Electronic Reporting, Processing, and Retrieval of Clinical Laboratory Data. DONALD A. B. LINDBERG.....	554
VIII. An Approach to the Automated Handling of Chemical-Biological Data in a Pharmaceutical Firm. C. W. DURACHTA, C. E. SCHENK, R. G. DICK, AND F. M. STURTEVANT.....	560
IX. Mechanized Retrieval from a Keyword Indexed Reference Pool. JOHN A. KOOISTRA, JR.....	577
Index of Authors.....	581
Index of Subjects.....	582
